| Outcome Accountability               | Certificate of completion               | Min. ₹3 LPA CTC guaranteed, or refund*                               |
| Best For                             | Freshers/Working professionals          | Serious freshers ready for a full-time career transformation         |

## 10 Reasons Serious Freshers Choose the Guarantee Track

**Real Accountability, Not Just a Certificate**

01

We take on the downside risk with you — if you meet every eligibility condition and still don't land a qualifying offer in 12 months, you're covered under our refund terms.

**A Career Transformation, Not Just a Course**

02

7 months of deep technical training, 1 month of focused interview readiness, and 4 months of real work experience — a complete pipeline from zero to employed.

**Interview Stamina Through Repetition**

03

A mock interview every 45 days means you walk into your first real interview having already faced 4–5 structured, feedback-driven mock rounds.

**Communication Skills — The #1 Reason Freshers Lose Offers**

04

Technically strong candidates get rejected for poor communication more often than for poor code. We fix that directly, throughout the program.

**Production-Grade Projects, Not Toy Demos**

05

Every capstone is mentored and reviewed the way a real engineering team would review it — because that's exactly what interviewers are screening for.

**A Dedicated Interview Bootcamp Month**

06

Not squeezed in at the end of training — an entire focused month for resume, LinkedIn, system design, behavioral prep, and salary negotiation.

**Real Internship, Real Experience**

07

4 months with partnered companies or direct-source internships — actual production tickets and mentorship, not a certificate-only placement.

**An HR Team That Actively Works For You**

08

Not a job board link-dump — our placement team sources roles, applies on your behalf, schedules interviews, and negotiates offers.

**A Guaranteed Income Floor**

09

₹3 LPA minimum CTC guaranteed — either through a direct offer or an internship that converts to a qualifying full-time role.

**One Continuous 12-Month Journey**

10

No gaps, no scattered self-study during your job search — every month has a clear owner and a clear next step until you're placed.

# Your 12-Month Path — Training → Prep → Internship → Offer

Three connected stages, each engineered to remove one specific reason freshers fail to get placed.

| MONTHS 1-7<br>Core Training                                                                                                                                                                                                                                                                                                                | MONTH 8<br>Interview Prep                                                                                                                                                                                                                                                                   | MONTHS 9-12<br>Internship & Placement                                                                                                                                                                                                                                                                                                    |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <ul style="list-style-type: none"><li>✓ Full 280-hr DevOps + MLOps + AI curriculum (19 phases)</li><li>✓ Mock interview every 45 days (4-5 cycles)</li><li>✓ Ongoing communication &amp; soft-skills grooming</li><li>✓ Production-grade, mentor-reviewed projects</li><li>✓ Personal mentor check-ins &amp; attendance tracking</li></ul> | <ul style="list-style-type: none"><li>✓ Resume &amp; LinkedIn overhaul</li><li>✓ Role-specific mock interviews (DevOps/MLOps/Cloud)</li><li>✓ System design &amp; scenario-based prep</li><li>✓ Behavioral interview coaching (STAR method)</li><li>✓ Salary negotiation training</li></ul> | <ul style="list-style-type: none"><li>✓ 4-month internship — partnered or direct companies</li><li>✓ Real production tasks, guided by an industry mentor</li><li>✓ Monthly performance reviews</li><li>✓ Dedicated HR team actively sourcing &amp; applying for you</li><li>✓ Support continues until a qualifying offer lands</li></ul> |

**WHAT MAKES THIS DIFFERENT**

**Most bootcamps end the moment training ends. This program is built around the 5 months *after* training — because that's when most freshers actually get stuck.**

## Everything Included, Start to Finish

|                                                                                                                                                                                                                      |                                                                                                                                                                                                     |                                                                                                                                                                               |

STAGE 1 • MONTHS 1-7

### Core Training — Same Curriculum, Extra Muscle

You go through the full MLOps Engineering Program (280 hrs, 19 phases — DevOps, Cloud, and Agentic AI, detailed in the main brochure). On top of that, four things run in parallel every single month.

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p><b>01 Mock Interviews Every 45 Days</b></p> <ul style="list-style-type: none"><li>✓ 4-5 structured mock interview cycles across the 7-month training period</li><li>✓ Conducted by industry-experienced interviewers, not just internal trainers</li><li>✓ Covers technical depth, scenario-based troubleshooting, and communication together</li><li>✓ Written feedback report after every cycle, with a personal improvement plan</li></ul>                              | <p><b>02 Communication Skills Grooming</b></p> <ul style="list-style-type: none"><li>✓ Spoken English &amp; professional communication practice, every week</li><li>✓ Technical explanation drills — explaining your own projects clearly and confidently</li><li>✓ Email, Slack, and stand-up communication etiquette used in real teams</li><li>✓ Presentation &amp; whiteboard explanation practice for technical rounds</li></ul>                                   |
| <p><b>03 Production-Grade Projects</b></p> <ul style="list-style-type: none"><li>✓ Every capstone is reviewed and mentored the way a real engineering team would review it</li><li>✓ Code review, architecture review, and deployment discipline enforced — not just "does it run"</li><li>✓ Projects designed to survive real interview scrutiny, not just check a syllabus box</li><li>✓ Portfolio built progressively so you can speak to it fluently by Month 7</li></ul> | <p><b>04 Ongoing Mentorship &amp; Accountability</b></p> <ul style="list-style-type: none"><li>✓ A personal mentor assigned to track your progress across all 7 months</li><li>✓ Attendance and performance tracked on a shared dashboard, visible to you and your mentor</li><li>✓ Early flags on any student falling behind, with a structured catch-up plan</li><li>✓ Monthly 1:1 check-ins to review technical progress and communication growth together</li></ul> |

**WHY THIS MATTERS**

**Most students don't fail interviews because they can't code — they fail because they've never practiced explaining their code under pressure. By Month 7, you'll have done it 4-5 times already, with feedback.**

# The Interview Preparation Bootcamp

One full month, zero new technical content — entirely dedicated to converting everything you've learned into offers. This is the sprint most bootcamps skip.

### W1 Resume, LinkedIn & Personal Branding

- ✓ 1:1 resume rebuild — projects framed as business impact, not just tool lists
- ✓ LinkedIn profile overhaul optimized for recruiter search & DevOps/MLOps keywords
- ✓ GitHub/portfolio cleanup so every project tells a clear, confident story

### W2 Technical & System Design Rounds

- ✓ Role-specific mock interviews: DevOps Engineer, MLOps Engineer, Cloud Engineer, AI Engineer tracks
- ✓ Scenario-based troubleshooting drills (production incident simulations)
- ✓ System design fundamentals for infrastructure & AI-system interviews

### W3 Behavioral & Communication Rounds

- ✓ STAR-method behavioral interview coaching
- ✓ Handling curveball & pressure questions with composure
- ✓ Group discussion and panel-interview simulation sessions

### W4 Offer Readiness & Negotiation

- ✓ Salary negotiation training — knowing your worth and how to ask for it
- ✓ Offer-letter evaluation support (CTC breakdown, growth path, red flags)
- ✓ Final full-length mock interview, scored against a real hiring rubric

### BY THE END OF MONTH 8

You'll have a polished resume, an interview-ready LinkedIn, 5+ mock interview cycles behind you, and a clear negotiation strategy — before you ever walk into a real interview room.

# Real Internship + Active Placement Support

Four months where you're not just interview-ready on paper — you're actually working, being mentored, and being actively placed by a team whose job is to get you hired.

### 4-Month Internship

- ✓ Placed with GRRAS-partnered companies, or supported into direct-source internships you find yourself
- ✓ Real production tickets and tasks — not shadowing, not busywork
- ✓ An assigned industry mentor at the internship organization
- ✓ Monthly performance reviews shared with both you and the GRRAS placement team
- ✓ Strong performers are prioritized for direct internship-to-offer conversion

### Dedicated HR & Placement Team

- ✓ Actively sources open roles matching your profile — not a static job board
- ✓ Applies to relevant openings on your behalf across our hiring partner network
- ✓ Schedules and coordinates your interviews directly with hiring companies
- ✓ Negotiates offers alongside you, using the Month 8 negotiation training
- ✓ Support continues every month until a qualifying offer is in hand

## How a Typical 4-Month Internship Flows

### M9 Onboarding & Integration

- ✓ Matched to a partner company or direct internship based on your strongest track
- ✓ Onboarded into real team workflows, tools, and codebases
- ✓ Initial goals set with your internship mentor

### M10 Real Ownership Begins

- ✓ Assigned real tickets/tasks with increasing responsibility
- ✓ Weekly sync with GRRAS mentor to track technical & professional growth
- ✓ Continued light-touch mock interviews to stay sharp

### M11 Performance & Conversion Push

- ✓ Formal performance review with the host company
- ✓ HR team begins active conversion conversations where applicable
- ✓ Parallel external applications continue if conversion isn't guaranteed

### M12 Offer Finalization

- ✓ Offer secured — either via internship conversion or an external hiring partner
- ✓ Offer evaluated and negotiated with HR team support
- ✓ Guarantee terms apply if no qualifying offer has been secured by this point

# Guarantee Terms & Eligibility Criteria

This page is a plain-language summary. The full terms, conditions, and refund process are governed by the official enrollment agreement signed at admission.

THE GUARANTEE, IN PLAIN LANGUAGE

If a fully eligible student — meeting every condition listed below — has not received a job offer of at least ₹3,00,000 (3 LPA) CTC, or an internship that converts to a qualifying offer, within 12 months of program start, the student becomes eligible for [XX]% refund of program fees as per the official Terms & Conditions.

## Eligibility Criteria for the Guarantee to Apply

Who Can Enroll

- ✓ Freshers only — no prior full-time work experience in the field
- ✓ Currently pursuing or graduated: BCA, MCA, B.Tech, or M.Tech (or equivalent)
- ✓ Committed to the full 12-month, full-time seriousness this program demands

What's Required Throughout

- ✓ Minimum [90]% attendance across all 12 months of the program
- ✓ Active participation in every scheduled mock interview cycle
- ✓ Demonstrated, assessed improvement in communication skills
- ✓ Completion of all production-grade projects and the final capstone
- ✓ Active participation in the placement process — applying to roles and attending scheduled interviews when placed by the HR team

THIS GUARANTEE ASSUMES EFFORT

This program is built on a two-way commitment. We commit to training, mentoring, and actively placing you. You commit to showing up, doing the work, and taking the process seriously. The guarantee protects students who meet both sides of that commitment.

## What Can Affect Guarantee Eligibility

- ✗ Attendance falling below the required minimum without prior approved leave
- ✗ Missing scheduled mock interviews or real interviews arranged by the HR team without valid reason
- ✗ Failed mocked interviews/projects
- ✗ Declining reasonable, qualifying job or internship offers presented by the placement team
- ✗ Incomplete capstone or production-grade project deliverables

NOTE:

Students who don't clear their mock interview or capstone evaluation get a 1-month extension to reattempt, renewable up to a maximum of 6 months — after which the enrollment agreement stands void.

OFFICIAL DISCLAIMER

This page summarizes the Career Guarantee Program's terms for informational purposes only. It is not the binding agreement. Refund percentage, exact timelines, approved leave policy, and the full eligibility framework are defined in the official enrollment & guarantee agreement provided at the time of admission — please read it in full before enrolling. [Legal team to finalize exact refund %, minimum CTC clause wording, and process before publishing.]
